

MACKIE TRACKTION 3 & TAPCO LINK.FIREWIRE

Tracktion 3 trims the fat and provides a single-screen interface for recording, editing and mixing music. Drag and drop loops, audio, virtual instruments, I/O and effects settings into a project without the visual clutter of multiple menus and panels. Loop support and ReWire integration make Tracktion a solid candidate for initiating electronic producers into audio recording. For I/O, consider the TAPCO Link.Firewire, a bus-powered 4x6 audio interface with high-quality Mackie preamps and a slim design. The Link's 24-bit/96kHz audio capabilities are a perfect match for Tracktion, and the mobility makes it a no-brainer.

STREET PRICE: Tracktion 3—\$250; Link.Firewire—\$200.
